

## A team in motion.

We are leaders in the development and installation of customized control solutions in the field of intralogistics. Our teams are active throughout Europe and work in a family-like environment that respects the value of their performance. At our site in Ettlingen, we employ around 200 people from over 28 nations. Our international clients, such as Amazon, DHL, Kaufland, Würth and Berlin airport, appreciate our modern work mentality and have been relying on our support for years.

With us, you can expect flat hierarchies and plenty of freedom. You'll translate complex customer data into functional, automated logistics concepts. You won't just be planning on paper, but will support pioneering projects from the initial data analysis right through to the final layout presentation, to give our customers a real competitive edge. At the same time, you'll actively contribute your experience to help shape the technology of our newly formed Solution Design Team.

Join us in shaping the intralogistics solutions of tomorrow and become part of our team in **Ettlingen (Baden-Württemberg)** and **Emden (Niedersachsen)** as:

## Senior Materials Flow Planner / Logistics Planner - full-time (40 hrs)

### Where you keep things moving

- **Data Analysis & Design:** You will **analyse** complex customer data (order structures, product master data, throughput) and use this to **identify requirements** for automated **material flow systems** – always taking into account space, budget and system integration

- **Technical Expertise:** You act as a **technical expert** and **solution representative** at client meetings, workshops and presentations across Central Europe
- **Layout & Design:** You create material flow diagrams, dimension subsystems, develop solution layouts and formulate comprehensive **technical specifications** and documentation
- **Team development:** You will play an active role in building and **further developing the technology** of our Solution Design Team and contribute to the **development of new planning tools**
- **Sales support:** Together with the sales team, you will ensure the success of **automation projects** and build strong **relationships** with technical contacts on the **customer side**

## How to reach your destination

- **Professional experience:** Several years' experience in solution design, system integration or technical consultancy within the intralogistics and automation sector
- **Analytical skills:** Strong analytical abilities and the ability to translate complex customer data into clear, cost-effective solution concepts
- **Communication skills:** Strong communication and presentation skills in German and English, enabling you to effectively convey technical concepts to both technical experts and non-technical audiences
- **CAD skills** (desirable): Ideally, you will have the ability to create layouts using CAD software
- **Willingness to travel:** Willingness to undertake short, targeted trips within Central Europe (e.g. for client meetings and on-site workshops)

## Benefits all the way

- A **structured onboarding process**, personal mentoring and professional dialogue with colleagues will enable you a good and smooth start
- Up to 100% remote working is possible – as well as a permanent workplace at one of our sites, such as Ettlingen or Emden

## Not yet in Ettlingen?

We will help you to settle in quickly, no matter what stage of life you are in – we will find a solution. If you move to Ettlingen, you will receive a relocation allowance from us. If you are not yet proficient in German or English, you can take part in language courses free of charge. There is also a subsidy for childcare, because it is important to us that your family feels at home here.

Your salary will depend on your qualifications and experience and will be discussed with you personally.
